

STORMY JACKSON

Product Designer

hello@stormyjackson.com | stormyjackson.com

SUMMARY

Product designer who ships end-to-end experiences at scale across e-commerce, marketplace, fintech, and healthcare. Strong interaction and systems thinking: untangles complex flows, designs for edge cases, and turns ambiguous problems into clear, scalable solutions. Zero-to-one experience defining new products from scratch, with a track record of measurable business outcomes and deep cross-functional collaboration.

EXPERIENCE

Product Designer, Mayo Clinic — June 2024 – Present

- Lead end-to-end design of patient-facing workflows for the Mayo Clinic Patient Portal, a platform serving 1.3M+ patients across 130+ countries.
- Partner with clinical, product, and engineering teams to untangle complex, high-stakes health workflows and design for edge cases within a regulated enterprise environment.
- Translate complex medical data and processes into clear, accessible digital experiences, designing to WCAG standards for a diverse, global patient base.

Product Designer, Tala — March 2022 – Aug 2023

- Designed Tala Rewards zero-to-one — defined an in-app loyalty program from scratch and shipped it to production, tied to an 11% reduction in loan default rates.
- Defined design principles that improved cross-functional consistency and accelerated team velocity, improving how the design team worked with product and engineering.

Product Designer, PayPal (Honey) — Aug 2021 – March 2022

- Redesigned dynamic product layouts for Honey marketplace storefronts, improving product discovery across 40,000+ stores and increasing sales and user retention.
- Improved organic search visibility by redesigning storefront page descriptions to align with SEO best practices.

Product Design Intern, Shopify — Sept 2020 – May 2021

- Designed the staff management feature for Shopify Inbox on desktop, enabling 1M+ merchants to add team members to customer communications.
- Maintained cross-platform feature parity across iOS, Android, and web by systematically auditing and updating shared components.

Product Design Intern, Lyft — June 2020 – July 2020

- Designed in-app phone call functionality to reduce missed connections between riders and drivers.
- Partnered with PMs, engineers, and researchers across the full design cycle — user research, wireframes, and high-fidelity prototypes.

SKILLS & TOOLS

Design: Interaction design · Design systems · Accessibility (WCAG) & inclusive design

Research & Methods: User research · Wireframing · Prototyping · Usability testing · Cross-functional collaboration

Tools: Figma · UserZoom · Photoshop · Illustrator · After Effects · Loom · Claude · Codex · Github

EDUCATION

University of Southern California — B.F.A. Design, Roski School of Art and Design
